About Us

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo is an IT solutions company established in 2018, dedicated to delivering reliable, scalable, and innovative technology services. Since our founding, we have focused on helping organizations optimize their operations through effective use of information technology.

With a strong foundation in infrastructure, networking, and system integration, we provide end-to-end IT solutions tailored to meet the unique needs of each client. Our team combines technical expertise with practical experience to design, implement, and maintain systems that support business growth and operational efficiency.

About Us

PT INTI CIPTA SOLUSINDO

At PT Inti Cipta Solusindo, we believe that technology should not only solve problems but also create new opportunities. We are committed to delivering high-quality services, ensuring system reliability, and maintaining strong partnerships with our clients.

Our core services include:

- Network and infrastructure design & implementation
- System integration and deployment
- IT security and monitoring solutions
- Maintenance and technical support

Driven by professionalism and innovation, PT Inti Cipta Solusindo continues to evolve alongside the rapidly changing technology landscape, helping our clients stay ahead in the digital era.

Vision & Mission

PT INTI CIPTA SOLUSINDO

Vision

To become a trusted and leading IT solutions provider that empowers businesses through innovative, reliable, and sustainable technology.

Mission

- Deliver high-quality IT solutions that align with client needs and business objectives
- Provide reliable, secure, and scalable infrastructure and system integration services
- Build long-term partnerships through professionalism, integrity, and excellent service

PT INTI CIPTA SOLUSINDO

Our Best Team

At PT Inti Cipta Solusindo, our strength lies in our people. Our team consists of experienced IT professionals with strong expertise in infrastructure, networking, and security solutions. Our leadership team brings years of experience in designing and implementing enterprise IT systems, ensuring every project is delivered with precision and reliability.

PT INTI CIPTA SOLUSINDO

Our Services

We are committed to delivering high-quality solutions, maintaining system reliability, and providing responsive support to our clients.

With a combination of technical expertise and practical experience, PT Inti Cipta Solusindo ensures every solution is built to perform, scale, and secure your business operations.

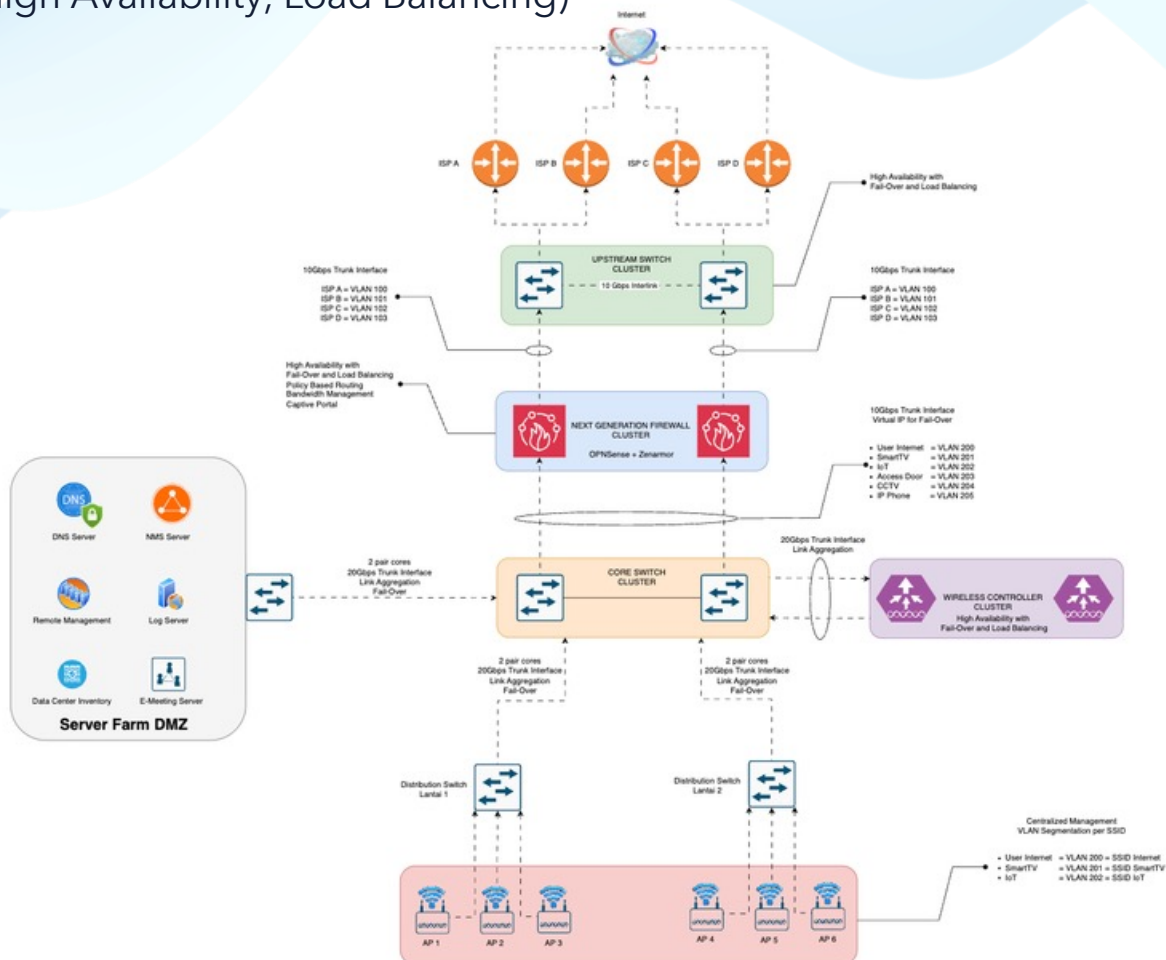

Ultra

PT INTI CIPTA SOLUSINDO

Managed Services

We deploy your network infrastructure either from scratch or continuing the existing one, complete everything to meet basic IT standard requirement (ie. High Availability, Load Balancing)

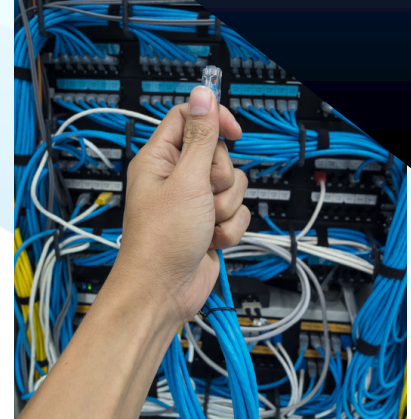

From Network Mapping, Resource Monitoring, ISP SLA Monitoring, E-Ticketing system, IT Asset Management, Syslog, IAM, Honeypot, etc...to all IT day-to-day activities are done by our NOC team 7x24 with excellent support from ready-to-dispatch field team.

Network Infrastructure

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo provides comprehensive IT infrastructure solutions designed to support modern business operations across various industries. With a strong focus on reliability, scalability, and performance, we deliver end-to-end services covering network implementation and system integration.

Our expertise includes the design and installation of structured network infrastructure, encompassing both indoor and outdoor LAN cabling. We are experienced in handling complex environments such as high-rise buildings, warehouses, and industrial facilities, ensuring optimal network performance, durability, and compliance with industry standards.

In addition to network infrastructure, we offer integrated solutions for surveillance and access control systems. This includes the deployment of CCTV systems, access door systems, and enterprise-grade wireless (WiFi) networks, all tailored to enhance security, visibility, and operational efficiency.

Network Security

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo places strong emphasis on network security as a critical component of modern IT infrastructure. In an era where cyber threats are increasingly sophisticated, we deliver comprehensive security solutions designed to protect organizational assets, ensure data integrity, and maintain business continuity.

Our approach to network security is holistic, combining preventive, detective, and responsive measures. We design and implement layered security architectures that safeguard networks from both external and internal threats. This includes the deployment and management of Unified Threat Management (UTM) systems, leveraging industry-leading platforms to provide integrated protection features including firewall, intrusion prevention (IPS), web filtering, antivirus, and VPN services.

Beyond perimeter security, we also focus on internal network protection through proper segmentation, access control policies, and secure authentication mechanisms. By implementing VLAN segmentation, role-based access, and monitoring tools, we help minimize the risk of lateral movement within the network in the event of a breach. Additionally, PT Inti Cipta Solusindo offers security assessment and hardening services to identify vulnerabilities and strengthen existing systems. This includes configuration reviews, patch management guidance, and best-practice implementation aligned with industry standards.

Software Development

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo provides professional software development services tailored to meet the specific needs of modern businesses. We design and develop reliable, scalable, and secure applications that support operational efficiency, data management, and digital transformation initiatives.

Our development approach focuses on understanding client requirements and translating them into practical, user-friendly solutions. We build a wide range of applications, including web-based systems, enterprise platforms, and custom business applications that can be integrated seamlessly with existing IT infrastructure.

We emphasize system performance, security, and maintainability in every project. From initial planning and design to development, testing, and deployment, our team ensures that each solution meets high-quality standards and aligns with business objectives.

In addition, PT Inti Cipta Solusindo supports system integration and automation, enabling organizations to streamline workflows and improve productivity. Our solutions can include reporting systems, financial applications, monitoring dashboards, and other customized platforms designed to enhance decision-making and operational control.

With a commitment to innovation and continuous improvement, we deliver software solutions that are not only functional but also adaptable to future business growth and technological advancements.

IoT Development

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo provides comprehensive Internet of Things (IoT) solutions that enable organizations to connect, monitor, and manage physical devices through intelligent and integrated systems. Our IoT services are designed to enhance operational visibility, improve efficiency, and support data-driven decision making.

We deliver end-to-end IoT implementations, starting from device and sensor deployment to network integration, data collection, and centralized monitoring platforms. Our solutions allow real-time tracking of assets, environmental conditions, and system performance across various environments such as offices, warehouses, and industrial facilities.

Our IoT capabilities include the development of monitoring dashboards, automated alerting systems, and data analytics platforms that transform raw data into meaningful insights. By integrating IoT with existing IT infrastructure, we help organizations streamline operations, reduce downtime, and improve overall control of their systems.

With a strong foundation in networking and system integration, PT Inti Cipta Solusindo ensures that every IoT deployment is secure, scalable, and reliable. We are committed to delivering solutions that bridge the gap between physical environments and digital intelligence, empowering businesses to operate more efficiently and proactively.

Data Center

PT INTI CIPTA SOLUSINDO

PT Inti Cipta Solusindo provides data center solutions specifically designed to meet the needs of mid-size enterprises, delivering a balance between performance, scalability, and cost efficiency. We understand that growing organizations require reliable and secure infrastructure to support business-critical applications without the complexity and overhead of large-scale enterprise environments.

Our data center services cover end-to-end design, implementation, and optimization of IT infrastructure, including server systems, storage, virtualization, networking, and backup solutions. We focus on building resilient architectures that ensure high availability, efficient resource utilization, and simplified management.

We support the deployment of virtualization platforms to maximize hardware efficiency and enable flexible workload management. In addition, our solutions incorporate redundancy and failover mechanisms to minimize downtime and ensure business continuity.

PT Inti Cipta Solusindo also provides data protection strategies such as backup and disaster recovery solutions, ensuring that data is secure and can be restored quickly in the event of system failure or unexpected incidents.

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

Certain projects undertaken by PT Inti Cipta Solusindo are subject to Non-Disclosure Agreements (NDA). As a result, specific client identities and project details cannot be disclosed. We remain committed to maintaining the highest standards of confidentiality and professionalism in all engagements.

✓ Ultra Manage Service - Government Project

- Manage networking equipment such as Router Gateway, Core Switch, Distribution Switch, Wireless Controller, Access Point etc.
- Manage UTM (Sophos) with HA configuration
- Manage Virtualization (Nutanix, VMWare & Proxmox)
- Manage Web Application (Framework Laravel & Code Igniter)
- Manage Database (Oracle & MariaDB cluster)

✓ Ultra Manage Service - Government Project

- Manage networking equipment for remote office such as Router Gateway, Distribution Switch, Wireless Controller, Access Point.
- Deploy ICS Resources Monitoring System

✓ Nextcloud with OnlyOffice - Government Project

- Migrate from Owncloud to Nextcloud, with total DB size ~300GB and user data ~3.4TB
- Build High Availability and Load Balancing with 4 nodes on 4 baremetal servers, this include Nextcloud Apps and Database.
- System integration Nextcloud with OnlyOffice
- Build Resource Monitoring System for all nodes.
- Used by all personel nation wide.

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Data Center Relocation - Gas & Oil Private Company

- Relocated from RDTX Building to Metropolitan Building
- Total of 12 Racks, 20+ Servers, 40+ Network Equipment
- Relocation also includes UPS System and PAC System
- Project duration is 15 days

✓ 10Gbps Backbone - Government Project

- Build 10Gbps backbone within a building for each floor
- Redesign the whole network to meet backbone redundancy for each floor
- Migrate all user traffic from existing 1Gbps network to 10Gbps network
- Migrate all web applications from existing 1Gbps network to 10Gbps network

✓ Sophos UTM replacement - Gas & Oil Private Company

- Replace old Cyberoam with Sophos UTM 5000 series
- working closely with client's HQ IT Team in different country
- Successfully replaced with 1 hour downtime

✓ VPN Service for IoT - Vendor for Banking

- Manage VPN Concentrator for 2000+ remote locations spreaded around the country
- Ensure the VPN availability is 99,9%
- Manage IP Addressing plan for over 10.000+ IoT equipment
- Support 7x24 by NOC

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Engineer Dispatch Service - International Network Access Provider

- Dispatch for CE Router installation
- Dispatch for CE Router troubleshooting
- Dispatch for LAN Activation with client's global team

✓ Cisco CUCM - Government Project

- Provide and configure Cisco CUCM to replace the EOL equipment
- To be connected with existing IP Phone accross the country using the existing dial plan

✓ IoT for Server Racks - Government Project

- Monitor temperature, humidity
- Monitor power consumption
- Monitor door status for security purposes

✓ IoT for Smart Office - Banking

- Monitor Temperature and humidity
- Monitor Power Consumption and calculate the currency cost
- Monitor flammable gas and integrate with fire alarm

✓ Manage Service Server - Government Project

- Server rental
- Virtualization Software rental
- Virtual Machine backup

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Fiber Optic Backbone - PT Gulaku

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ LAN Installation - PT Bayer Indonesia

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Thermal Camera Installation - PT Bayer Indonesia

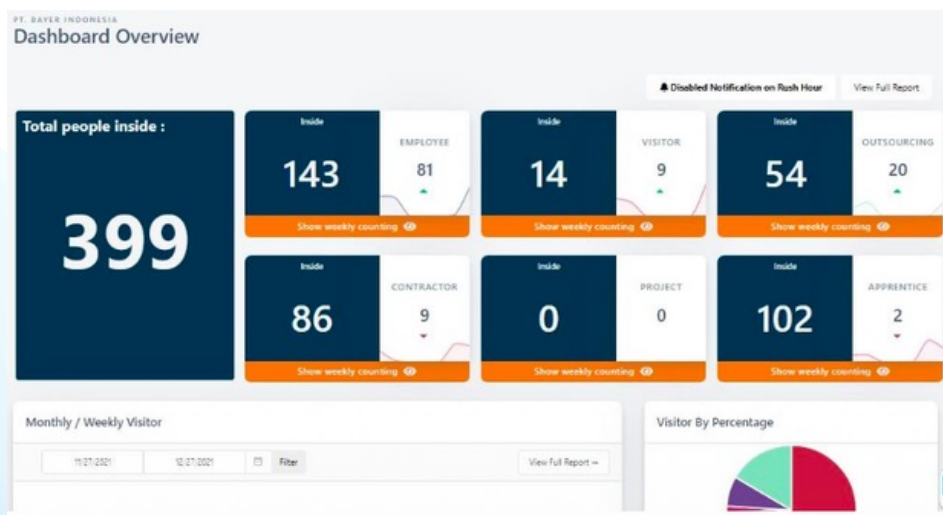

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ People Counting System - PT Bayer Indonesia

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Wireless Backbone P2P - Dharma Group

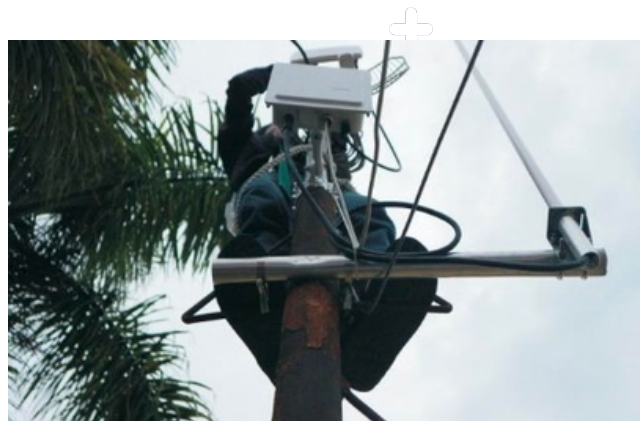

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Wireless Backbone P2P - Astra Plantation

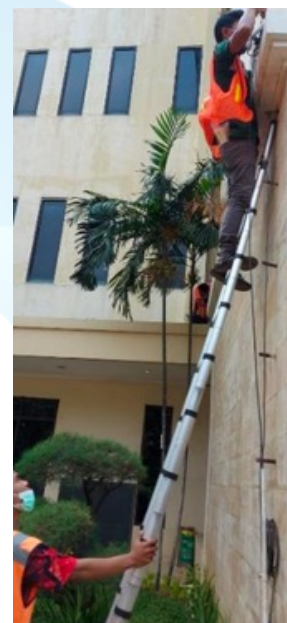

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ LAN Cabling & CCTV - STIK Jakarta

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ Wireless Backbone P2P - Sampoerna Telekomunikasi

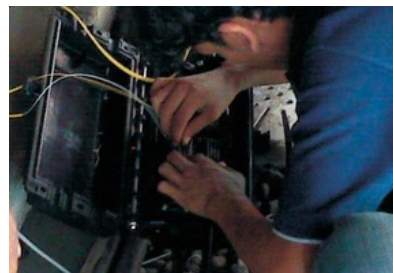

Projects

PT INTI CIPTA SOLUSINDO

Project Highlights

✓ CCTV Installation - Soekarno Hatta Airport

✓ CCTV Installation - PT Akufood Indonesia
